“Working with 1ClickSecurity was one of the best decisions we made during our journey toward CMMC Level 2 certification. Their team went far beyond simply providing guidance—they became a true partner in helping us design, implement, and document the security controls required to protect Controlled Unclassified Information (CUI). From performing our initial gap assessment to developing our System Security Plan, policies, and procedures, 1ClickSecurity provided expert support every step of the way. When our assessment concluded, we successfully achieved CMMC Level 2 certification with zero findings and no Plan of Action and Milestones (POA&Ms). That outcome speaks volumes about the preparation and commitment that 1ClickSecurity brought to our organization. I would strongly recommend 1ClickSecurity to any defense contractor seeking CMMC compliance.”
